

Oshima Shohei

FULL STACK DEVELOPER

Profile

Web development was my hobby since a teenage. At now my hobby becomes a job that gives me the freedom and the right to manage my work time and place myself. I always try to achieve maximum results because the satisfaction of the clients is my top priority. I am truly believing that your task will be done honestly, high quality and on time.

- Backend (Node.js, Express.js, Typescript)
- Frontend (React.js, React Native, Redux, Redux-Saga, Redux-Thunk)
- Blockchain (Solidity, Web3.js, NFT, Smart Contract, Solana)
- Python (Dash, Flask, Django, Panda, TensorFlow)
- Database (MySQL, Firebase, MongoDB, NoSQL)
- JavaScript Libraries (D3.js, anime.js, Chart.js, Three.js, BIDEO.JS)
- PHP (Laravel, Codelgniter)
- JavaScript, CSS, HTML, jQuery, Bootstrap, Angular, Vue

Experience

JUNIOR WEB DEVELOPER, Nagano

APRIL 2012 — NOVEMBER 2013

- Consistently deliver a quality work product and work assignments based on established project guidelines and objectives
- Create and modify modules in our BrightspotBright, spotBrightspot Content Management System using JavaScript, Node and Free Marker
- Work with third party tools as Google Tag manager, Google DFP, Krux, Gigya and Silver Pop
- Use PHP/MySQL to add functionality to our custom developed LMS, LRS and Lead Generation Platforms
- Collaborate with overseas contractor on a regular basis with the option for alternative work hours
- Use CSS to implement the design mockups of new modules for our LMS powered websites
- Be part of a lean, fast paced, and highly versatile Scrum team

Backend DEVELOPER, Remote

JUNE 2014 — NOVEMBER 2018

- Performs a variety of tasks. May provide consultation and knowledge transfer
- Typically reports to a Project Manager or Project Lead
- Reviews, analyzes, develops, and modifies computer applications
- Participate in the redesign of government health web site using modern web development technologies and techniques
- 4 years of working with and knowledge of Model-View-Controller software architecture
- Designs, develops and maintains a set of enterprise class web applications in Node.js/Typescript technologies – both frontend and backend (jQuery, AJAX, Node/Express, CSS, Typescript, SharePoint)

Hobbies

Developing, Learning, Sport
(Football)

- Follow best software development practices to ensure high quality product

Employment History

Full Stack Developer, OnlineMeetup, Nagano

OCTOBER 2020 — MARCH 2021

All Online Meetups is a Web Application that is a communication platform for organized communities. It brings the real time messaging capabilities of Slack together with the distributed video meeting capability of Zoom. It does for organized communities what Microsoft Teams does for organizations.

My part in the product:

- Product Management - I did market surveys and generated the client list.
- Solutions Architect - I decided on a Google Firebase platform for cost, performance and scalability.
- Technical Lead - I designed and provided oversight to the development, QA, and deployment teams.
- UX Developer - (1 of 2) I took the designs from the UX designer and developed the UI to work on desktop, mobile and tablet.
- Backend Developer - I was the main backend developer creating all business logic, authentication, authorization and data storage.

Technologies applied on this project:

- Angular
- Node
- HTML
- CSS
- Firebase Functions
- Firebase Authentication
- Cloud Firestore
- Firebase Realtime Database
- Sockets

Integrations on this project:

- Zoom API
- Google Firebase Cloud Messaging (FCM)
- Stripe

Backend Developer, Goformz, Remote

JANUARY 2020 — JULY 2020

Link: <https://zenveiw.co/>

Description:

I have been working on this project for the last 1 years as a Senior Full-Stack Web developer. There I work with isomorphic React, that renders on the server, based in Material UI, as a middleware we used Redux. Server side has been developed with Node.js (just for rendering React components according to routes and sending them as an answer for HTTP requests) and Django (main server-logic). Being part of team, we created a new version of this application and delivered it to the clients and common users. This is my greatest project, where I did the most complicated tasks using React in my career.

Full Stack Developer, Around25, Remote

FEBRUARY 2018 — MARCH 2020

Project: <https://www.koyfin.com/cetf>

Tech: Node.js, React.js, Redux, Cryptocurrency, GraphQL, Bootstrap 4, JQuery, JavaScript, HTML5

Description:

The goal was to create a platform for managing access for employees who are working in offices. Mobile phone, in this case, is becoming a pass card. Here I worked as a Full-Stack developer using MERN stack. We have complicated API, several servers written on Node.js/Express and React/Redux front-end part. I have worked here as a part of the development team, creating main dashboard and its functionality.

Education

BCompSc, Suwa University of Science, Nagano

SEPTEMBER 2011 — JULY 2014
